

PRIORITY PUMP AND SUPPLY

Full-line equipment supplier of general oilfield supplies and solar & wind turbine solutions

- ★ Including measurement equipment, pumps, valves, meters, hoses, gauges and fittings. "We build hoses" for all applications.
- ★ Field Service, Custom Application Engineering and Consulting for oilfield equipment and Solar or Wind Turbine Power Solutions for Standard, Remote or Harsh Environment installations.
- ★ Distributor for Solar and Wind Power Generators and Remote Communication Devices.

#1 in Customer Service!

Meters: *New and Refurbished*

Authorized Reseller

Turbines

EDD
Halliburton

Water Meters

Brooks
Invensys
Floco
Blancett

Barton Recorders

Dry Flow
Pressure
Temperature

Hoses: *"We Build Hoses" for all applications*

Hydraulic
Chemical
Gas
Oil
Air

Miscellaneous Parts & Services

Gas Measurement Supplies & Equipment
Gauges
Stainless Steel Tubing
Tube & Pipe Fittings
In-line Checks

Field Service, Engineering, & Consulting

Call today to discuss how our Engineering Staff can help improve your operations. We can help you reduce emissions, reduce or remove dependence on electrical power requirements, and meet mandated emission reductions.

Solar & Wind Turbine Solutions

Exclusive Distributor for Maverick Solar SunFlow™ Product Line

SunFlow™ Product Line Provides the Solution

Dependable, efficient solar or wind turbine energy provides the required power, *all year long.*

Operate in Sub-Freezing temperatures
No electrical service required
Replace gas-driven pumps
Eliminate VOC emissions
Meet EPA, Federal, and State mandated emission requirements
Increase production revenues

Configurations Available for Multiple Applications:

Oil & Gas field applications
Power chemical injection pumps
Heat chemical injection pumps in sub-freezing conditions
Pump antifreeze to heat valve orifices
Power sensors, meters for remote areas without electrical service
Provide remote radio communication and controls
H₂S scavenger
Shallow gas dewatering
Cathodic Protection

General power supply
Circulate water tanks
Electrical submersible pumps replace windmills
Replace gasoline generators for remote housing

Reduce Electrical Power Consumption and Costs

Provide Off-Grid power
Reduced operating and maintenance costs

Federal and state incentives subsidize cost of installation

Short term investment can provide Positive Cash Flow
